DEPARTMENT OF ENVIRONMENT AND
CONSERVATION
Quarterly Dispenser Inspection Log**

**DIVISION OF UNDERGROUND
STORAGE TANKS
4TH Floor, L & C Tower
401 Church Street
Nashville, TN 37243-1541**

Instructions

Tennessee Underground Storage Tank Rules require that visual inspections be made of all petroleum dispensers on a quarterly basis. Rule 1200-1-15-.04(1)(f) states;

“The dispenser cover shall be opened and a visual inspection for petroleum releases, including seeps and drips, shall be performed at least quarterly, that is, at least once every three (3) months. A log of these inspections showing at a minimum the last twelve (12) months shall be maintained by the owner and/or operator.”

- Use this form to record results of visual inspections of each dispenser at the facility once each quarter.
- A separate form should be used for each facility. Indicate the year this form is for in the space provided.
- The front of this form has space for seven dispensers. If there are more than seven dispensers at this facility, use the back of this form.
- If no leaks, seeps, or drips are noted, mark OK in the appropriate column and row.
- If a leak, seep, or drip is observed, note it in the appropriate column and indicate the action taken. Remove any product in the dispenser sump.
- You must take measures to repair any leaks, seeps, or drips observed. If there is no dispenser containment sump, seeps and drips must be reported as confirmed releases according to rule 1200-1-15-.05 and .06.
- Maintain the last 12 months of these inspections and have them available for state inspection.
